AssetCare™ for Buildings

HVAC & Indoor Air Quality

Indoor air quality managed for you

We get it. You've got a lot on your plate and need to focus on finding ways to bring your customers, and your revenue, back. In the midst of COVID-19, they are concerned about their health and safety, and you need to reassure them that your building is safe.

We can help

AssetCare for Buildings is a fully managed service that provides complete Indoor Air Quality monitoring and protection for your buildings. We take care of managing the details for you, freeing you up to take care of your business.

How does it work?

A complete managed solution

Smart sensors measuring five indoor air quality indicators

24/7 monitoring by our expert Live Operations team

Full ventilation control

On-call troubleshooting and issue resolution support

Advanced filtration and purification options

Four layers of indoor air quality protection

Monitored around the clock by our Live Operations team to ensure your solution is constantly working and meeting local health & safety guidelines.

Hospital grade air purification with active ionization or ultra-violet options available.

Humidity

CO & CO₂

VOCs

Particle Density

Measure and manage key indoor air quality indicators to mitigate the spread of airborne pathogens including COVID-19.

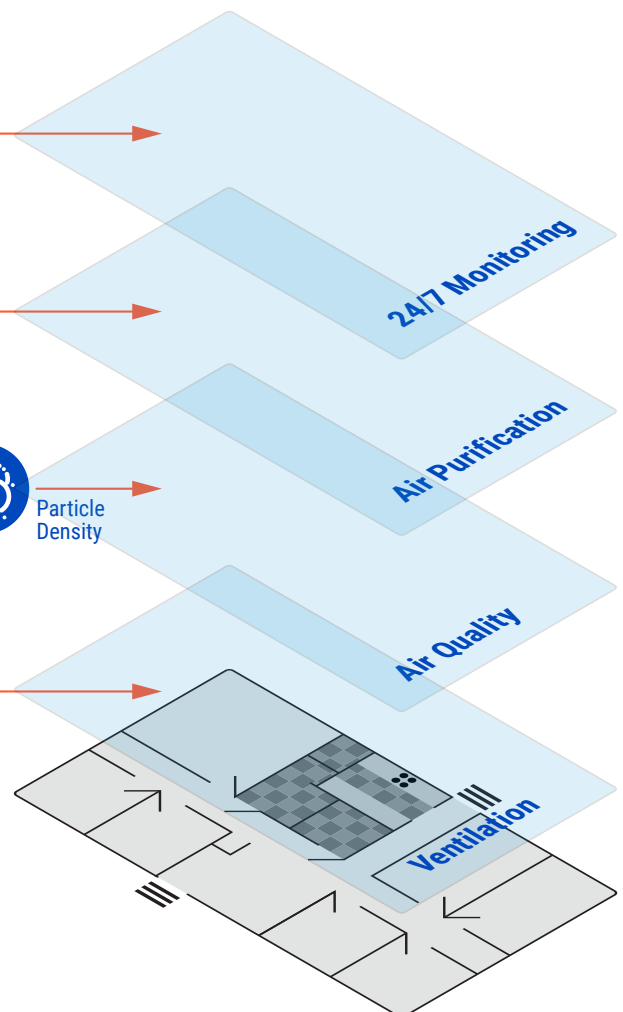

HVAC

Temperature

Ensure maximum outdoor air is brought in, combined with temperature control for occupant comfort.

How do we do it?

The only complete solution that provides quality assurance and ensures your business meets all local health and government standards.

Simple subscription with no up-front costs

Flexible term arrangements - fit for you

Indoor Air Quality Assurance Program

Indoor air quality has always been important to you. But today, more than ever, maintaining your indoor air quality to exacting specifications for health and safety is critical to the on-going success of your business.

Our Indoor Air Quality Assurance program, developed in collaboration with our expert medical advisory panel, gives you the confidence to welcome your employees and customers back, knowing the air they are breathing is safe.

Every AssetCare solution exceeds WHO, CDC and ASHRAE guidelines

4 key steps to indoor air quality you can trust

HVAC & Ventilation

Full ventilation for all occupied spaces to ensure maximum outside air

Filtration & Purification

Active ionization and ultra-violet options available

Monitoring

Real-time monitoring by our expert Live Operations team

24/7 Compliance

Ensure you are meeting local and federal safety guidelines

The AssetCare Indoor Air Quality Assurance Program measures and monitors key air quality metrics to rigorous standards designed to mitigate the spread of airborne pathogens.

AssetCare targets for good indoor air quality

- Particulate Matter (PM2.5): < 25 $\mu\text{g}/\text{m}^3$
- Total Volatile Organic Compounds (TVOC): < 500 $\mu\text{g}/\text{m}^3$
- Carbon Dioxide (CO₂): < 1,000 ppm
- Carbon Monoxide (CO): < 9 ppm
- Relative Humidity (RH): 40 – 60%

Display your AssetCare Indoor Air Quality badge with pride.

**Ensuring the quality of the
air inside your building is
essential to the ongoing
success of your business.**

**AssetCare is your Indoor Air
Quality solution in the fight
against COVID-19.**
